👤 SUMMARY

Software Developer specializing in modern web applications and AI integration. Experienced in building responsive, high-performance user interfaces using Next.js and Tailwind CSS. Brings a strong technical foundation in Python to develop robust applications, integrate machine learning pipelines, and deploy LLMs and English/Arabic NLP features into production environments.

🎓 EDUCATION

The University of Jordan 10/2019 – 07/2023
Bachelor's Degree in Business Information Technology
GPA: 3.38 (Very Good) Amman, Jordan

🧠 SKILLS

- | | | | |
|------------|-------------|---------------------|----------|
| • Python | • SQL | • Jupyter Notebooks | • NextJS |
| • Tailwind | • Excel | • Figma | • C++ |
| • Java | • Wiki Data | • Bootstrap | • R |

📁 PROFESSIONAL EXPERIENCE

Software Developer & Data Specialist 06/2025 – Present
Freelancer

- Experimented with Large Language Models (LLMs) fine-tuning and model quantization for potential production deployment.
- Prepared and pre-processed complex linguistic datasets including Arabic book corpus.
- Built a standalone Python desktop application using Kivy. The project involved data preprocessing, Arabic NLP, Arabic Reshaper & Bidi Algorithm libraries for the accurate render of Arabic text.
- Designed, developed, and deployed a responsive portfolio web application utilizing Next.js, Tailwind CSS, and Cloudflare to showcase technical projects and data capabilities.

Junior Business Analyst 08/2024 – 05/2025
Microsystems LLC Amman, Jordan

📁 PROJECTS

Immersive E-commerce Website 11/2025 – 04/2026
Agentic Shopping Assistant

- Developed a highly responsive, adaptable e-commerce storefront utilizing Next.js, Tailwind CSS, and Zustand prioritizing fast load times, cross-device performance, and user experience.
- Designed the front-end structural framework and UI to support the future integration of an agentic AI shopping assistant for automated customer support.

Registration & Schedule Optimization System 10/2022 – 06/2023
Project Manager & Lead Developer | Graduation Project

- Developed an end-to-end full-stack registration platform using HTML, CSS, Bootstrap and JavaScript front-end, ASP.NET/C# back-end, and Microsoft SQL Server for the database.
- Engineered a hybrid recommendation engine combining collaborative and content-based filtering, utilizing Python, NLP, and K-Means Clustering to suggest personalized course schedules.
- Implemented a mathematical optimization function using CVXPY to automatically balance hard and soft scheduling constraints tailored to individual student requirements.

COURSES

IBM Data Science Professional Certificate

IBM | Coursera

03/2024 – present

Data Analysis with Python

Coursera

04/2026

Fine-tuning Language Models

Hugging Face

07/2025

Python for Data Science and Machine Learning

Udemy

2023

VOLUNTEERING

Nahno.org

A Total Number Of 166 Recorded Volunteering and Participation Opportunities Hours Through Nahno.org, Most Notably:-

- Nahno Ambassador at Jordan University (50 Hours) | 2021/2022
- Translating Articles About Artificial Intelligence On Arabic Wikipedia (32 Hours) – The Arabic Content Club At The Hashemite University | Oct 2021

09/2021 – Present

Monitoring, Evaluation and Learning Volunteer

Jordan River Foundation

02/2026 – 03/2026
